

## Dear fellow Members and Supporters

To maintain our relevance and to maintain our integrity within the community and the authorities, I believe we need the following additional expertise in our organisation and that is:

- **Social Media Management including our website**
- **'Help Desk' support which has proved to be very valuable in engaging with our community**
- **Public Relations / Media Management**
- **Fund Raising help and management as well as pursuing potential benefactors**
- **Financial Management**
- **Membership Development and Management**

If you believe you and /or maybe someone you know is able to provide any of the above support/contribution to help us progress would really be appreciated.

Let me know and/or maybe also let me know if there is some other way you can assist us going forward.

We are able to **create advisory subcommittees.**

If you wish to help in some other way please just send an email direct to our email address above address.

Many thanks.

Regards

**Peter Clough**
